

DCi Series

The DriveCore Install series is a complete line of highly efficient, high performance installation amplifiers based on the proprietary DriveCore technology. DCi Series amplifiers are designed, engineered and manufactured to the industry's highest quality standards, and provide system integrators with the advanced features and flexibility required for challenging installed sound applications. Power points of 300W, 600W or 1250W in 2-/4-/8-channel configurations, all in a 2U form factor. Direct Drive Constant Voltage means no need for a step-up transformer at the output to drive 70 or 100v systems and produces higher audio quality much more efficiently. Individual channels in the same amplifier can be configured as hi/low-Z as required. Bridgeable, even in 100V mode. Remote on/off interface. Network models have monitoring and control via Audio Architect, BLU-Link, DSP and programmable GPIOs. ND models have AVB connectivity.

CDi DriveCore Series

The CDi DriveCore Series is a cost-effective amplifier line based upon Crown DCi platform technology and provides a power amplifier solution that captures industry trends of higher channel density & feature rich design at a reasonable cost with integrated DSP and front panel display. Representing the continued development of Crown's installation amplifiers, it has similar features to DCi but is tailored to meet the needs of a selective market segment that requires a balance of features, price, and performance. Features such as 100Vrms and 4 channel amplifiers will appeal to international markets. All models have network capability, and each model has an analogue and an analogue + BLU link version, making this series a high-value but affordable option for contractors.

Comtech DriveCore Series

Crown ComTech DriveCore series amplifiers are 1U, convection cooled, ultra energy efficient amplifiers. Offering up to eight channels and 150 watts per channel the ComTech DriveCore amplifiers are the ultimate for solution for a range of fixed installation environments, from video conferencing in boardrooms to luxury suites in stadiums. The integrated DriveCore technology chip offers greater than 90 percent efficiency with no compromise in performance and boasts a signal-to-noise ratio of 110dB. DriveCore also has patented feedback and protection circuits integrated into the silicon for fast and accurate response. The amplifiers feature flexible input routing and universal power supply and each model weighs only 10lbs.

VRack

Complete amplification system. Allows multiple configurations for different types of speakers. AES, VDrive, Analogue and Network inputs for multiple connections. Captive suspension provides lifting and hoisting options for venue flexibility. Dimensions permit easy shipment: US and European truck configurations, sea containers, etc. 5 pin CEE form and 5 pin Hubbell Twist Lock. Monitors input metering (peak and RMS), output metering (peak and RMS) and overall gain reduction. Built-in network and AES failover sends network and AES info to the next rack even if there is an AC failure. Available with three IT-12000HD or IT-4x3500HD amps, or empty without amplifiers.

XTi2 Series

Next generation of the popular XTi Series. Integrated signal processing including: 6 band parametric input EQ; Butterworth and Linkwitz-Riley crossover; 8-band parametric output EQ; 50mS delay for signal alignment; Enhanced SubHarmonic Synth with increased user control over frequency, gain and filter type. PeakX Plus™ Limiters provide the ultimate in system performance and protection by allowing full control over threshold, attack, and release. Increased number of presets to a total of 30; 29 of which are user definable. Locking power cable. Updated HiQnet Band Manager™ and System Architect™ control software. User-defined fan mode control for matching fan performance to a specific application. Models weigh between 8.4 and 10.9kg.

XLS DriveCore 2 Series

The next generation of XLS got a makeover with a sleek new look, a LCD display that is three times larger, and more DSP with higher capabilities. Like its predecessor, the new XLS is ultra-efficient with Crown's patented DriveCore technology and tons of headroom guaranteeing a clean, undistorted signal straight to your speakers. The XLS DriveCore 2 assures that you will be heard as you deliver a powerful, pure sound experience for any venue.

DSi Series

Onboard digital signal processing includes crossovers, EQ filters, delay and output limiting. Rear panel HD-15 connector provides easy input/output connectivity between DSi amplifiers and the new DSi-8M System Monitor. The intuitive front panel LCD screen guides installers through a setup process – featuring presets for the industry-standard JBL cinema loudspeaker systems – to make configuration quick and easy. At the touch of a button, DSi cinema amplifiers deliver perfectly matched performance with each award-winning JBL ScreenArray® system, making this the ultimate cinema solution.

DSi 8M

Eight channel projection booth monitor. 8 channels for monitoring processor or amplifier inputs. All inputs and outputs are balanced to interface with new cinema processors. Input levels for processor and power amps can be adjusted independently. No level jumps when switching between processor and amplifiers. Bargraph display may be calibrated to the reference level for your theatre. 25-pin D-sub connectors, plus removable terminal blocks and HD-15 for quick, hassle-free connections. Designed to work with bi-amplified sound systems to monitor the high and low frequency outputs from the left, centre and right channels.

XLC Series

Available in two models, the XLC2500 and XLC2800 incorporate Crown's proprietary DriveCore™ Technology, which significantly reduces the amplifiers' size, while yielding much more energy efficient operation – without sacrificing performance. Compact, powerful and cost-effective, the XLC Series provides ease of installation, outstanding sound quality and the unwavering reliability inherent in every Crown product. These amplifiers are powerful, affordable options for both the cinema and install markets.
